Looking to make a difference?
Want the option of working from home?
Want to take time during the week to recreate when there are less people, by working over a weekend?
Are you interested in part-time work in order to raise kids or transition into retirement?
Tired of talking and ready to get stuff done?

With a career at the St. Vrain and Left Hand Water Conservancy District, you can!

If you thrive in a fast paced environment, have a passion for water, want to be part of a legacy, and crave the freedom to achieve work-life balance, this is an excellent opportunity for you.

Since 1971 the District has served its community by developing, managing and protecting water resources in the Longmont area. As the District moves to implement new and strategic programs and projects, it is seeking a Water Resources professional (engineer, scientist, project manager) as an integral part of a three person team.

As a team member, you will work with a group of committed professionals who are dedicated to continuing and enhancing the District’s leadership role in the Colorado water community.

For more information about the District, please visit www.svlhwcd.org

Applicants must submit cover letter, resume, references and salary requirement to:

St. Vrain and Left Hand Water Conservancy District
